▶ TDAP is a unique initiative focussed on supporting UK SME businesses developing novel zero emission enabling automotive technologies.

▶ TDAP delivers funding and expert industry support over an 18-month period – helping you to develop your ideas from concept through to viable market proposition.

▶ TDAP enables participants to accelerate their strategy, business case and technology development.

▶ Backed by the Department for Business, Energy and Industrial Strategy, TDAP is delivered by the Advanced Propulsion Centre.

Department for
Business, Energy
& Industrial Strategy

TDAP has supported 36 companies with over £7 million in funding

'Having a good idea is only a fraction of what makes a business. The experts helped us to understand how we could build a business around that and progress towards commercialisation.'

Marcel Fowler, New Motion Labs
TDAP Wave 2

'By the end of the project we will have gone from a single proof of concept to validation in a relevant environment with partners that are recognised internationally.'

Dr Yura Sevcenco, Reaction Engines
TDAP Wave 3

'TDAP has been absolutely fundamental for our company. It has been the seed funding that enabled us to develop sub-systems that go into our battery modules.'

Doug Cross, Balance Batteries
TDAP Wave 4
